DIAMOND AND RELATED MATERIALS

Synthesis, characterization and applications of cubic boron nitride

Effect of deposition parameters on the formation of cubic BN films deposited by plasma-assisted chemical vapour deposition from non-toxic material 355
M. Z. Karim, D. C. Cameron and M. S. J. Hashmi (Dublin, Ireland)

Growth and characterization of C–N thin films 360
M. Y. Chen, X. Lin, V. P. Dravid, Y. W. Chung, M. S. Wong and W. D. Sproul (Evanston, IL, USA)

Synthesis and characterization of diamond and related materials

Increase in nucleation density of diamond film growth by d.c. plasma chemical vapor deposition 365
Y. Hibino and Y. Hayashi (Ibaraki, Japan)

The role of hydrogen in diamond synthesis from carbon dioxide–hydrocarbon gases by microwave plasma chemical vapor deposition . . 368
C.-F. Chen and T.-M. Hong (Hsinchu, Taiwan)

Synthesis of diamond thin films through a transformation of a catalytically produced diamond precursor phase 374
B. Oral and A. Flodström (Stockholm, Sweden)

The effect of noble gases on the formation of CVD diamond film 380
H. C. Shih, C. P. Sung and W. L. Fan (Hsinchu, Taiwan)

Crystallite geometry of hot filament chemical vapor deposited diamond 387
W. B. Alexander, P. H. Holloway (Gainesville, FL, USA), L. Heatherly and R. E. Clausing (Oak Ridge, TN, USA)

Scale-up and industrial applications of diamond and related materials

Diamond film growth on cemented tungsten carbides studied by SEM, AES and XPS 392
J. L. Chen, F. M. Pan, C. S. Chang, T. S. Lin (Chutung, Taiwan), T. H. Huang and C. T. Kuo (Hsinchu, Taiwan)

Formation of diamond films from low pressure radio frequency induction discharges 397
R. A. Rudder, G. C. Hudson, R. C. Hendry, R. E. Thomas, J. B. Posthill and R. J. Markunas (Research Triangle Park, NC, USA)

Diamond coating using multiple flame torches in an atmospheric chamber 403
M. Murakawa and S. Takeuchi (Saitama, Japan)

Diamond synthesis in supersonic direct-current arcjet plasma at subtorr pressures 408
M. H. Loh and M. A. Cappelli (Stanford, CA, USA)

Diamond and related materials (poster session)

Investigation of the early stages of diamond film growth by ellipsometric monitoring 414
Y. Hayashi and Y. Hibino (Tsukuba, Japan)

Adhesion and structure of c-BN films produced by ion-beam-assisted deposition 418
N. Yamashita, T. Wada, M. Ogawa (Yokohama, Japan), T. Kobayashi, H. Tsukamoto and T. Rokkaku (Hiroshima, Japan)

TRIBOLOGICAL COATINGS/SURFACE MODIFICATIONS

Reduction of friction through coatings/surface modifications

Effects of surface composition, environment and morphology on friction and wear: an overview 423
Y.-W. Chung (Evanston, IL, USA)

Friction and wear of diamond and diamondlike carbon coatings 428
K. Miyoshi (Cleveland, OH, USA), R. L. C. Wu and A. Garscadden (Dayton, OH, USA)

Applications of solid lubricant films in spacecraft 435
M. R. Hilton and P. D. Fleischauer (Los Angeles, CA, USA)

Aluminum metal matrix composites tailored for antifriction applications 442
S. V. Prasad (Dayton, OH, USA)

Microstructure and tribological behaviour of plasma immersion ion implanted tool steels 447
M. Samandi, A. Pauza, G. Hatziandoniou, H. Yasbandha (Wollongong, NSW, Australia), R. Hutchings, G. A. Collins and J. Tendys (Menai, NSW, Australia)

Wear resistance of ceramic, metallic, and composite coatings

Performance and wear of carbide coated by physical vapour deposition in interrupted cutting 453
W. König and R. Fritsch (Aachen, Germany)

A comparison of the tribological behaviour of several wear-resistant coatings 459
S. E. Franklin and J. Beuger (Eindhoven, Netherlands)

Study of the relative wear and abrasion resistance of Ti(C,N) and TiN coatings 466
S. K. Ghosh and M. S. Kohler (Rochester, NY, USA)

New ways towards better exploitation of physical vapour deposition coatings 470
W. König and D. Kammermeier (Aachen, Germany)
Substrate- and interface-related influences on the performance of arc-physical-vapour-deposition-coated cemented carbides in interrupted-cut machining 476
O. Knotek, F. Löffler and G. Krämer (Aachen, Germany)
Rolling-contact fatigue and wear resistance of hard coatings on bearing-steel substrates 482
A. Erdemir (Argonne, IL, USA)
Scuffing behavior of TiN-coated steel rollers under rolling and sliding conditions 490
T. P. Chang, M. E. Graham, W. D. Sproul and H. S. Cheng (Evanston, IL, USA)
Tribological behavior of oil-lubricated TiN-coated steel 496
O. O. Ajayi, A. Erdemir, G. R. Fenske, F. A. Nichols (Argonne, IL, USA), W. D. Sproul, M. Graham and P. J. Rudnik (Evanston, IL, USA)
Properties of TiN coatings deposited onto hot work steel substrates plasma nitrided at low pressure 502
T. Gredić, M. Zlatanović, N. Popović and Ž. Bogdanov (Belgrade, Yugoslavia)
Effects of nitrogen ion implantation on the mechanical properties of laser-deposited thin films of TiC and TiN on stainless steel 508
A. V. Kulkarni, N. Mate, S. M. Kanetkar, S. B. Ogale (Pune, India) and B. G. Wagh (Nasik, India)
Surface modification and wear characteristics of yttria-doped zirconia 516
D. Chatterjee, D. Majumdar and S. Ghosh (Rochester, NY, USA)
Some tribological observations of sliding tungsten carbide coated steel against aluminum 521
A. J. Stavros (Indianapolis, IN, USA) and J. V. Reid (Richmond, VA, USA)

Coating resistance to erosion, corrosion, and severe environments

Erosion and erosion–corrosion behavior of chromized–siliconized steel 529
B. Q. Wang, G. Q. Geng (Xian, China) and A. V. Levy (Berkeley, CA, USA)
Physical vapour deposition coatings for dental prostheses 536
O. Knotek, F. Löffler (Aachen, Germany) and K. Weitkamp (Bad Sachsa, Germany)
The morphology and mechanical properties of Al_2O_3, ZrO_2 and SiC laser-assisted physically vapour deposited films 541
H. Sung, G. Erkens, J. Funken, A. Voss, O. Lemmer and E. W. Kreutz (Aachen, Germany)
Multilayer Ti–Cu sputter films for the Gravity Probe B gyroscope housings 548
P. Zhou, S. Buchman, K. Davis, C. Gray and J. P. Turneaure (Stanford, CA, USA)

Analysis, modeling, and micromechanical testing of tribological coatings

Properties of sputter-deposited hydrogenated carbon films as a tribological overcoat used in rigid magnetic disks 552
H. J. Lee (Milpitas, CA, USA), J. K. Lee (San Jose, CA, USA), R. Zubeck (Milpitas, CA, USA), M. Smallen (San Jose, CA, USA) and D. Hollars (Milpitas, CA, USA)
Nanoindentation and microindentation studies of hard carbon on 304 stainless steel 557
T. Wright and T. F. Page (Newcastle upon Tyne, UK)

Tribological properties of diamond, diamond-like, and c-BN coatings

Tribological properties of hard carbon films: extremely low friction mechanism of amorphous hydrogenated carbon films and amorphous hydrogenated SiC films in vacuum 563
S. Miyake (Saitama, Japan)
Tribological properties of hard carbon films produced by the pulsed vacuum arc discharge method 570
H. Ronkainen, J. Likonen (Espoo, Finland) and J. Koskinen (Helsinki, Finland)
Physical and tribological properties of rapid thermal annealed diamond-like carbon films 576
R. L. C. Wu (Dayton, OH, USA), K. Miyoshi (Cleveland, OH, USA), R. Vuppuladhadium and H. E. Jackson (Cincinnati, OH, USA)

Tribological coatings/surface modifications (poster session)

Protective coatings of amorphic diamond on fragile and sensitive substrates 581
T. J. Lee, H. Park, J. H. You, F. Davanloo and C. B. Collins (Richardson, TX, USA)

OPTICAL FILMS AND HIGH THROUGHPUT PROCESSING

Novel deposition process

Industrial sputter coating of large stainless steel sheets 586
D. Hofmann (Hanau, Germany) and S. Shiotani (Tokyo, Japan)

MANUFACTURING PROCESSES AND EQUIPMENT APPLICATIONS

Surface modification methods

Maskless laser etching of kerfs in ceramic materials for applications in magnetic recording heads slider fabrication 590
J. Khan (Shrewsbury, MA, USA)

Applications

The in-line arc ion-plating system for high throughput processing of automobile parts 594
H. Tamagaki, K. Tsuji (Kobe, Japan), T. Komuro, F. Kiyota and T. Fujita (Niigata, Japan)

Adherent metallization of carbon-fibre-reinforced plastic composites using a combined vacuum/electrochemical deposition process 599
J. Fessmann, D. Mann, G. Kampschulte, F. Leyendecker, T. Bolch, K. Mertz (Stuttgart, Germany), D. Jonke, F. J. Gammel, M. Meyer and R. Suchentrunk (Munich, Germany)

Manufacturing processes and equipment applications (poster session)

Development of mass-production-type plasma chemical vapour deposition equipment and its application to various dies 604
K. Kawata (Saitama, Japan)
